

TABLE DES MATIÈRES

<i>Avant-propos</i> , par L. CALEMBERT	xv
W. R. DEARMAN : The characterization of rock for civil engineering practice in Britain	1
R. BARBIER : La géologie au service des grands travaux	77
J. L. KNILL : The application of engineering geology to the construction of dams in the United Kingdom	113
G. LOMBARDI : La prévision dans la construction des tunnels. Géologie et Mécanique des roches	149
L. CALEMBERT <i>et al.</i> : Géologie de l'Ingénieur au site du métro de Liège	163
W. R. HANSEN : Some Engineering geologic effects of the 1964 Alaska Earthquake . . .	193
G. S. ZOLOTAREV : Geological laws of landslides and falls. The basis of theory studying and forecasting them	211
L. B. JAMES : The role of engineering geology in building the California State Water Project	237
Q. ZARUBA : Importance of Quaternary events for the geological conditions of building sites	259
E. SERGEEV <i>et al.</i> : The influence of genesis and post-genetic processes on the engineering-geological properties of clays and loesses	273
V. COTECCHIA : The huge aquifere and the marine intrusion into fissured and karst mesozoic limestones of Apulia (Southern Italy) : Recent studies and investigations by employing modern methodologies	291
M. ARNOULD : Problèmes de cartographie en Géologie de l'Ingénieur. Cartographie géotechnique	313
