

ACTA STEREOLOGICA

CONTENTS	Page
<i>STERMAT '90</i>	
Directed measurements and heterogeneous structures in quantitative fractography, E.E. Underwood	149
Simulation of real cross-sections of particle population, L. Jeziorski, K. Stawuta	167
On the use of some geometrical measurements to study the plastic deformation of polycrystalline materials, K.J. Kurzydowski	175
Techniques for the measurement of grain size distributions during grain growth, B. Ralph	181
 <i>MISCELLANIES</i>	
A general method to solve the integral equations of stereology, M.A. Fortes	193
Stereological model tests for the spatial POISSON-VORONOI tessellation, R. Krawietz, U. Lorz	203
Stereological analysis of the adrenal gland cortex in the male rats treated with hydrocortisone, V. Milošević, M. Hristić, D. Kalafatić, V. Koko, G. Ušćerbrka	213
Mice parafollicular and intrathyroid mast cells under thyrotropin influence, M. Logonder-Mlinšek, M. Kališnik	223
Ultrastructural markers of tubular transport in acute experimental renal ischemia. Evaluation of the proximal and distal tubules, L. Cieciura, Z. Kidawa, W. Godlewski	233
