

ACTA STEREOLOGICA

CONTENTS	Page
<i>STERMAT '90</i>	
Preface, J. Ryś	3
Granulometry and granulomorphy by image analysis, J.L. Chermant, M. Coster	7
Estimation of true interlamellar spacing in pearlite, A. Czarski, J. Ryś	25
On some misunderstanding of fracture roughness parameters, L. Wojnar	37
The stereology of the intergranular surface of a metal, D.A. Aboav	43
The second-order analysis of particle sizes by a test quadrat method, K. Wiencek, H. Hougardy	55
Stereological parameters of carbide particles and properties of conventional and nonledeburitic high-speed steels, J. Cwajna, J. Richter, J. Szala	63
Grain size distribution, M. Maliński, J. Cwajna, J. Chrapoński	73
 <i>MISCELLANIES</i>	
A contrast definition for logarithmic images in the continuous setting, J.C. Pinoli	85
Computer controlled on-line diffractometry of micrographs, K. Scheer, R. Lasch, S. Boseck	97
The Davy index of mineral liberation, R. Coleman	103
Effectiveness of steel wire reinforcement in a boundary layer of concrete, P. Stroeven	113
How to count and size fluorescent microbial plankton with digital image filtering and segmentation, D. Schröder, C. Krambeck, H.J. Krambeck	123
Changes in freeze-fractured mitochondrial membranes during spermatogenesis, L. Cieciora, D. Tosik, K. Zieliński	131
Quantification of drug-stimulated collagen fibrillogenesis with a granulometry algorithm based on mathematical morphology, E. Viljanen-Tarifa, D. Schoëvaert, A. Tang, A. Robert	137
