

THE ISS: AN OVERVIEW

Anna-Mary Carpenter

Northwest Center for Medical Education, 3400 Broadway,
Glen Park, IN 46408

Having served as secretary-treasurer for a number of years, I had an opportunity to follow the growth of the ISS which led to this abbreviated summary covering the 25-year period.

Membership. Perhaps the most interesting statistic is that 14 individuals are recorded as holding continuous membership from May, 1962, when the first list was published in 'Stereologia' (Table 1), to the present day.

Table 1

Abadia-Fenoll, F.	Pathology
Bach, G.	Mathematics
Bertalanffy, F.	Anatomy
Cohen, M.	Metallurgy
DeHoff, R.	Metallurgy
Gurland, J.	Metallurgy
Haug, H.	Anatomy
Hilliard, J.	Metallurgy
Jaffee, O.	Biology
Kleiss, E.	Anatomy
Moore, G.	Metallography
Underwood, E.	Metallurgy
Weibel, E.	Anatomy
Werner, L.	Brain Research

If one examines the composition of the membership in 1962 (Table 2), the 118 members represented 18 countries and 13 fields of interest.

Although the total membership of the society has not exceeded 400 persons, typically a quarter of the membership changes address each year.

When one compares the membership in 1962 with that of January 1987 (Table 3) a number of points are noteworthy: there are now 400 members from 37 countries; biologists and metallurgists in virtually equal numbers continue to predominate; there has been a continuing growth of membership (37 persons) in eight third-world countries; major fields of interest in the society reflect the composition of interest in world science,

Table 2
Membership in 1962

| 4. Geology | 9. Pathology | |
| 5. Mathematics | 10. Petrology | |

i.e. from astronomy and geology to image analysis, computer science and statistics. With emphasis on space sciences, one would anticipate emergence of new fields of interest in the future.

Publications. The Newsletters were circulated without cost to members for many years (mine date from 1971). These were provided as a result of the efforts of the respective presidents of the society and of Dr. Ondracek. *Acta Stereologica*, launched in 1982, has grown in size and distribution under Dr. Kališnik's stewardship.

Dues. As a society, ISS provides the best buy in the world. The basic dues were \$3 (US) from 1962 to 1972, \$5 from 1973 to 1980 and \$15 from 1981 to the present; this represents a total of \$160 for the 25 years. In addition, one could receive at reduced rates the *Journal of Microscopy*, and now also *Acta Stereologica*.
