<i>REVIEWS</i>	
Stereological analysis of particle characteristics , <i>E. E. Underwood</i>	7
Stereological properties of powders and sintered alloys , <i>K. S. Cherniavsky</i>	17
Applications of stereology in pathology: A brief guide , <i>F. H. White</i>	25
<i>PAPERS</i>	
A comparative study of methods of unfolding size distributions , <i>A. G. Flook</i>	39
Grain size distributions in stationary grain models , <i>D. König, V. Schmidt</i>	47
Topological analysis of dendritic growth at various stages of cerebral development , <i>H. B. M. Uyilings, R. W. H. Verwer, J. Van Pelt, J. G. Parnavelas</i>	55
Vertex analysis of the growth of Purkinje cell dendritic fields of the mouse , <i>M. Sadler, M. Berry</i>	63
Nuclear morphology and RNA content as markers of functional integrity of nerve cells, with application to the study of dementia , <i>D. M. A. Mann</i>	73
Compensation mechanisms for experimental reduction of the capacity in the guinea pig placenta , <i>F. van der Heijden</i>	81
Volumetric evaluation of pulmonary alveolar toxicity: The BHT model , <i>P. R. Fillion, M. G. Côté</i>	89
Length densities and minimum diameter distributions of the air and blood capillaries of the paleopulmo and neopulmo of the avian lung , <i>N. J. Maina, V. Howard, L. Scales</i>	101
Stereological assessment of the epithelial-connective tissue junction in experimental oral cancer , <i>F. H. White, K. Gohari</i>	109
Vascularity in experimental oral neoplasia: A stereological approach , <i>F. H. White, B. Al-Azzawi</i>	119
Changes in jejunal arteries in spontaneously hypertensive and normotensive rats following neonatal treatment with capsaicin , <i>T. M. Scott, S. C. Pang</i>	127
Morphometric analysis of human muscle biopsies by use of an electronic image analyser (Quantimet 720) , <i>P. Tankosic, C. Marchal, J. Floquet, C. Burlet</i>	135
Goitre involution: Iodide as an hypervascularity antagonist , <i>J. B. Rognoni, C. Penel, F. Ducret</i>	145
Stereological investigations of thyroid in female rats treated neonatally with estrogen , <i>V. Pantić, M. Sekulić</i>	151
Quantitative evaluation of mouse peritoneal macrophage spreading by image analysis determination of the nucleocytoplasmic ratio , <i>D. Schovaert-Brossault, M. Rocharveiller, D. Kaplan, P. Michel, B. Mace, J. P. Giroud, A. Pompidou</i>	159
A stereological comparison of chronic lymphocytic leukaemia cells and normal lymphocytes , <i>V. James</i>	167
Stereological studies on mitochondria and rough endoplasmic reticulum in myeloma cells , <i>E. J. Hughson, V. James, G. Hudson</i>	175
<i>SHORT NOTES</i>	
Some empirical functions for use in the parametric modelling of stereological size distributions , <i>L. E. Scales, V. Howard</i>	187
Computer mnemonics for the stereology of a fibrous system , <i>H. J. Swatland</i>	193
