

## ACTA STEREOLOGICA

### CONTENTS

Page

#### STEREOLOGY IN MATERIAL SCIENCES

##### *Modelling of materials structure*

##### **Application of stereology in materials science and engineering,**

*A.M. Gokhale, N.U. Deshpande* ..... 253

**Fractals in materials research, E.E. Underwood** ..... 269

**Quantitative studies of recrystallization in polycrystalline materials,**  
*K.J. Kurzydłowski* ..... 277

**Efficient and unbiased evaluation of size and topology of space-filling grains, G. Liu, H. Yu, W. Li** ..... 281

**Application of probabilistic models to the description of the growth of titanium carbides during liquid phase sintering, J.L. Quenec'h, M. Coster, J.L. Chermant** ..... 287

**Quantitative estimation of particles with large size variation,**  
*J. Richter, J. Cwajna, J. Szala* ..... 293

**Stereological parameters of model polycrystalline structures built from polyhedra of various shape and size, J. Chrapoński, M. Maliński, J. Cwajna** ..... 299

**Fourier analysis of austenite particles shape in a duplex stainless steel, J. Bystrzycki, G. Żebrowski, K.J. Kurzydłowski, K. Jasek**..... 305

**Fractality and polydispersity in microstructure of silicon nitride ceramics, H. Hermann, M. Bertram, A. Wiedenmann, M. Herrmann** ..... 311

**An application of cluster analysis to the studies of grain growth pattern in polycrystals, T. Czujko, J. Bystrzycki, K.J. Kurzydłowski** ..... 317

**On the computer aided description of grain size distribution in polycrystalline materials, J.J. Bucki, K.J. Kurzydłowski** ..... 323

##### *Non-ferrous materials, particle systems*

**Modelling of hot reduction effect on carbide phase of tool alloys,**  
*M. Maliński, J. Cwajna, J. Szala, F. Grosman* ..... 329

**Stereometric characterization of unidirectionally solidified dendritic structure, Z. Gácsi, A. Roósz** ..... 335

<b>Effect of modification with alkaline earth metals upon the morphological parameters of non-metallic inclusions, T. Lis .....</b>	<b>343</b>
<b>Quantitative analysis of structural changes in Al-Si alloys surface layer subsequently to fine turning operation, J. Grum, M. Kisin .....</b>	<b>349</b>

*Non-metallic materials, fibre structures*

<b>Estimation of fiber length and diameter distribution from SEM images, H. Talbot, D. Jeulin .....</b>	<b>357</b>
<b>Steel wire efficiency in mechanical testing of concrete, P. Stroeven .....</b>	<b>363</b>
<b>On the importance of morphological investigations for the development of ceramic capacitors, M. Prod'homme, L. Chermant, J.L. Chermant, M. Coster .....</b>	<b>369</b>
<b>Image analysis of sintered Moroccan clays, L. Chermant, J.L. Chermant, M. Coster, R. Moussa .....</b>	<b>375</b>
<b>Effects of sintering time and temperature on BaTiO<sub>3</sub> - ceramic microstructural characteristics, B. Jordović, V. Mitić, Z.S. Nikolić .....</b>	<b>381</b>
<b>Probabilistic aspects of evaluation of fibre-matrix adhesion from pull-out fibre lengths on fracture surfaces of short fibre composites, Z. Kořínek, V. Beneš .....</b>	<b>389</b>
<b>Influence of pressing pressure on microstructure and electrical characteristics of BaTiO<sub>3</sub> ceramics, V. Mitić, Z.S. Nikolić, B. Jordović, Lj. Živković .....</b>	<b>395</b>
<b>Determination of 3-D air void characteristics in hardened concrete by means of image analysis, N. Lens, J. Elsen .....</b>	<b>401</b>

*Steels*

<b>Quantitative structural criteria of steel quality control, J. Cwajna .....</b>	<b>409</b>
<b>The fractal analysis of impact fracture of bearing steel, Y. Zhao .....</b>	<b>427</b>
<b>Quantitative description of dual-phase steel microstructure, J. Cwajna, J. Szala, J. Herian .....</b>	<b>433</b>
<b>Effect of quenching temperature on microstructure and properties of cast duplex stainless steel, G. Radenković, Z. Cvijović, D. Mihajlović .....</b>	<b>439</b>

*3-D RECONSTRUCTION*

<b>Spatial distribution of pores in translucent alumina studied with a confocal scanning laser microscope, L.M. Karlsson, A. Liljeborg .....</b>	<b>447</b>
<b>Stereological investigation of spatial fibre processes using confocal scanning laser microscopy, T. Mattfeldt, A. Clarke, G. Archenhold .....</b>	<b>453</b>

**Segmentation of range images, T. Pajdla, V. Hlaváč, R. Šára ..... 459**

**YOUNG STEREOLOGISTS**

**Quantitative analysis of leaves of sun and shade ecotypes of Solanum dulcamara L., J. Albrechtová ..... 467**

**Quantitative description of the plastic deformation of grains in polycrystalline materials, D. Łasęcki, K.J. Kurzydłowski ..... 473**

**Quantitative analysis of dislocation substructures, M. Mutl, R. Sedlák, E. Keilová, J. Kočík, V. Beneš ..... 479**

**Determination of the degree of textural orientation in recrystallized carbonate rocks, F. Mádai ..... 485**

**An adaptive discrete contour smoothing, E. Dinet, B. Laget ..... 491**

**Adaptive texture image segmentation using local-base pyramids, H. Konik, M. Calonnier, B. Laget ..... 499**

**LIST OF PARTICIPANTS OF THE 6TH EUROPEAN CONGRESS FOR STEREOLOGY ..... XV**

**AUTHOR INDEX ..... XXVI**

**SUBJECT INDEX ..... XXVIII**

**INSTRUCTIONS TO AUTHORS**

ACTA STEREOLOGICA	VOL 13	NO 2	PP 251 - 504	LJUBLJANA	JUNE 1994
