

CONTENTS	Page
EDITORIAL	183
MATHEMATICS	
<b>Line intercept sampling</b> , <i>R. Coleman</i>	187
<b>Measurement of response function in cell behavior by laser Fourier technique</b> , <i>S. Ishizaka</i>	199
PARTICLE ANALYSIS	
<b>Theoretical estimation of errors in evaluating sphere size distribution and population density due to variations in section thickness</b> , <i>P. E. Rose</i>	205
<b>Unfolding determination of spheroidal size-shape distribution from small profile samples</b> , <i>K. Miyamoto</i>	211
<b>Unbiased linear property estimation for spherical particles, from 'thin' sections</b> , <i>K. R. Clarke, M. N. Moore</i>	219
INSTRUMENTATION AND SOFTWARE	
<b>Microscopy, morphology and microcomputers</b> , <i>L. G. Briarty, J. Fisher, P. H. Jenkins</i>	227
<b>Microcomputer programs for quantitative autoradiography and stereology</b> , <i>P. Cau, J. L. Boudier</i>	235
NEUROBIOLOGY	
<b>The concept of 'neuromorphotaxis' based on a minimisation principle. A case for the critical analysis of biological variation</b> , <i>V. Howard, L. Scales</i>	241
<b>The use of horseradish peroxidase (HRP) in the stereological analysis of motor nuclei</b> , <i>R. Lynch, V. Howard</i>	253
<b>The location and size distribution of neurons in the layered cortex</b> , <i>H. Haug</i>	259
<b>Morphometry of synapses on identified neurons in the visual cortex</b> , <i>L. J. Müller, B. N. Cardozo, G. Vrensen</i>	269
SPATIAL ANALYSIS AND PATTERNS	
<b>Tracing structures in serial sections by computerized superimposition</b> , <i>S. Eins, J. Lessmann</i>	279
<b>Computer generated three dimensional reconstructions from serial sections</b> , <i>E. Dykes, F. Afshar</i>	289
<b>A three dimensional assessment of dental asymmetry in human maxillary first premolar teeth</b> , <i>S. Sri-Skanda, J. G. Clement, E. Dykes</i>	297
<b>Recent developments in point pattern analysis</b> , <i>P. J. Diggle (Short note)</i>	305
ANISOTROPY	
<b>Suitability of measured parameters and minimum sample sizes required to quantify capillary supply to fish muscle</b> , <i>S. Egginton, I. A. Johnston</i>	309
OTHER BIOLOGICAL APPLICATIONS	
<b>Stereological analysis of the rat neurohypophysis</b> , <i>J. A. Boudier, P. Cau, J. L. Boudier, A. Massacrier</i>	323
<b>Golgi secretion and follicular genesis in rat foetal thyroid</b> , <i>C. Penel, L. Remy, S. Rua, E. Mazzella</i>	329
<b>Determination of the absolute volume of differentiating cells in the epithelium of the human hard palate</b> , <i>W. Müller-Glauser (Short note)</i>	335
PATHOLOGY	
<b>Quantitative automated analysis of sural nerve biopsies from patients with uraemic polyneuropathy</b> , <i>J. Selva, G. Said, T. Druke, D. Schoevaert-Brossault</i>	341
<b>Morphometric approach to immunohistochemistry: Carcinoembryonic antigen (CEA) in ovarian tumours</b> , <i>M. L. Aalto, Y. Collan, T. Romppanen, K. Lauslahti</i>	347
