

ACTA STEREOLOGICA

CONTENTS

Page

Segmentation of cytological images using color and mathematical morphology , <i>L. Olivier, E. Elmoataz, C. Hubert, G. Gilles, L. Michel, E. Hubert, R. Marinette</i>	1-14
A comparison of three estimators of the coefficient of error of optical fractionator cell count estimates , <i>E. M. Glaser, P.D. Wilson</i> ...	15-25
Angiogenesis evaluated with a new complexity measure , <i>H. Kurz, J. Wilting, B. Christ, K. Sandau</i>	27-32
Remodeling of vascular smooth muscle cells in the rabbit after multiple gestation , <i>M. W. M. Knaapen, M. M. Kockx, O. Bouterin-Falson, F. Heutte, M. Finet</i>	33-37
Stereological estimation of size-weighted enterocyte mean size in bat small intestine , <i>L. M. Karlsson, A. N. Makanya</i>	39-47
Stereological analysis of ice flow-induced preferred orientation of small clasts in tertiary tillite matrix of Mt Feather , <i>P. Stroeven, A. P. Stroeven, D. H. Dalhuisen, J. J. M. van der Meer</i>	49-60
Grain size description – relationships between 2D and 3D parameters , <i>J. Cwajna, J. Chrapoński, M. Maliński</i>	61-66
Evaluation of sintered carbides microstructure through automatic image analysis , <i>J. Richter, J. Cwajna, J. Szala</i>	67-74
Quantitative fractography of sintered carbide , <i>J. Richter, J. Cwajna, S. Roskosz</i>	75-80
Usefulness evaluation of the stereological methods applied for grain size estimation , <i>J. Chrapoński, J. Cwajna, M. Maliński</i>	81-88
Image analysis of polycrystalline materials microstructure , <i>J. Szala, J. Cwajna</i>	89-94
<i>LIST OF ISS MEMBERS</i>	95-118
